Art Unit: 2622

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. Note MPEP 606.01.

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "-type" in all six independent claims is a relative term which renders the claim indefinite. The term "-type" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Applicant is directed to MPEP 2173.05(b)E wherein it is explained that the suffix or phrase "*type*" expands the scope of a claim and therefore renders that claim indefinite.

As a suggestion, the term being removed altogether would not detract from the scope or description otherwise of the subject matter.

Art Unit: 2622

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The claims appear allowable over the prior art (notwithstanding the 112 2<sup>nd</sup> paragraph rejection) because the prior art does not disclose or suggest the specific luminance coefficient generation and application to a light valve to modify the (composite) optical signal conveyed to a screen in a projection display system, as specifically recited in the six independent claims.
